Here's a quick step-by-step guide on how to start RMI for this Sheet:

1. Compile all necessary Java files:

```
javac src/AccountImpl.java src/AccountInterface.java src/
AccountingEntriesImpl.java src/
AccountingEntriesInterface.java src/Client.java src/
Server.java
```

You can also use the Shortcut :

```
javac src/*
```

2. Change directory to `src`:

```
cd src
```

3. Start the RMI registry:

```
rmiregistry
```

4. Run the RMI server

5. Run the RMI client

That's it!
